

SELF INTRO

Thank you for giving me the opportunity to introduce about myself, I'm **Logesh N**, an IT professional with expertise in **networking, programming, and web development**. I hold a **B.Tech in AI & DS** from **K.S. Rangasamy College of Technology, Tamil Nadu**, with a **CGPA of 8.91 (2024)**.

I have worked on projects like "**Beyond Words - A Sign Language Translator**", an AI-driven communication tool, and "**SNAP NOTES WEB APPLICATION**", a web-based note management system.

I gained industry experience through **internships**, including **Networking Engineer Trainee at Pallavaa Groups**, where I worked on **network troubleshooting, Active Directory, and asset management**, a **Salesforce Developer Virtual Internship**, and a **Web Developer Internship at Zidio Learning**.

I am proficient in **Java, MySQL, HTML, CSS, JavaScript, and Bootstrap**, with strong skills in **troubleshooting, router configuration, Active Directory, and operating system management**.

I have earned certifications in **Introduction to Cybersecurity** and **Cybersecurity Essentials** by **CISCO**, **Java** by **Great Learning**, and **Introduction to MS Excel** by **Coursera**. Passionate about solving complex problems, I aim to contribute innovative solutions in **IT, networking, and web development**.

WHAT IS DEVOPS?

DevOps is the integration and automation of the software development and information technology operations. DevOps encompasses necessary tasks of software development and can lead to shortening development time and improving the development life cycle.

How does DevOps work?

- **Collaboration**

DevOps encourages teams to work together across the entire application lifecycle.

- **Automation**

DevOps uses technology to automate processes that were previously manual and slow.

- **Integration**

DevOps integrates development and operations processes to eliminate roadblocks and improve efficiency.

Benefits of DevOps

- **Faster delivery:** DevOps enables organizations to deliver applications and services faster than traditional software development processes.
- **Better quality:** DevOps enables organizations to create more reliable products.
- **Better customer service:** DevOps enables organizations to respond to customer needs more effectively.

- **Faster business goals:** DevOps enables organizations to achieve business goals faster.
